

**Title: Meter Enclosure Cover**  
**Phone: 902-483-9527**

**Inventor: John Gregory**  
**Date: February 11, 2004**

### **Claim**

I claim that the meter enclosure cover protects the contents of the meter enclosure from tampering, rain, dirt, dust, etc, while allowing the meter to be fully visible at all times.

The meter enclosure cover allows access to the meter, while preventing the meter from being removed from its socket. The meter enclosure cover allows the face of the meter to be exposed while maintaining the meter at a low profile in the meter enclosure.
